

## Scrum #3 Meeting Notes

1. What have you accomplished since the last meeting?
2. Are there any obstacles in the way of meeting your goal?
3. What will you accomplish before the next meeting?

	Question 1	Question 2	Question 3
Alex	Finished implementing the radius feature in the back and frontend, as well as all of the tests associated with the feature.	No	Implement pagination on the backend and work on implementing JDBC functions.
Connor	Pair Programming with Emily. Added JDBC functions for various user operations. Created signup servlet and tests.	No	Implement JDBC functions for list management, reordering, and search history. Plan incorporation of database into larger web app.
Emily	Pair programming with Connor. Added JDBC functions for login/signup functionality. Created login/signup servlets.	No	Implement additional JDBC functions for quick access list & list management (reordering).
Julia	Finished writing the remaining black box tests for the login page. Finished implementing the front-end of the login page. Implemented front-end for the radius feature. Added the front-end and tests for the quick access list. Finished the backend for radius and integrated it with frontend with tests	No we are moving smoothly.	Implement the pagination front-end and make sure it's integrated with the back-end. Write the black box tests for the pagination feature. Implement stars for ratings and dollar signs for price on the results page. Begin styling login, search, and results
Will	Pair Programming with Julia. Finished writing the remaining black box tests for the login page. Started implementing the front-end of the login page. Implemented front-end for the radius feature.	No	Implement the pagination front-end and make sure it's integrated with the back-end. Write the black box tests for the pagination feature. Implement stars for ratings and dollar signs for price on the results page. Begin styling the login, search, and results
