

## Scrum #3 Meeting Notes

1. What have you accomplished since the last meeting?
2. Are there any obstacles in the way of meeting your goal?
3. What will you accomplish before the next meeting?

	Question 1	Question 2	Question 3
Alex	Implemented the search caching with Connor, and made a variety of other changes to help pages load faster and run faster.	No	Fix travis to run faster by caching ruby and ruby gems. Make travis work with https.
Connor	Implemented the cache functionality with Alex. Some progress on HTTPS.	No	Fix JUnit Config File Setup w/ a before/after function for all test cases to ensure config file is NOT modified if a test case fails or passes. Refactor backend servlets/functions. Grocery List.
Emily	Working on HTTPS. Got certificates and keys, difficulty in implementing the protocol within our project.	No	Decide to finish HTTPS through localhost or deploy through Heroku. Begin work on grocery list data persistence.
Julia	Finished a lot of UI changes Finished most of the pagination except for changing the number of results per page to 10. Finished styling for navigation bars so that they are all the same Added styling to the search page to make it look nicer	No.	Begin working on testing and implementing the Grocery List on the front-end.
Will	Finished most of the pagination except for changing the number of results per page to 10. Made general UI changes	No	Begin working on testing and implementing the Grocery List on the front-end
